EDUCATION

Brunel University

London, UK

B.S. in Computer Science

Expected Graduation, June 2027

- **Concentrations:** Programming (Java), Software Engineering
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Object-Oriented Programming, Logic and Computation, Networks and Operating Systems

EXPERIENCE

Brunel University

London, UK

Clearing Call Centre Assistant

Aug 2026 – Aug 2026

- Delivered exceptional service to prospective students via high-volume inbound and outbound calls in a fast paced environment while remaining calm and professional under the pressure
- Used Azorus CRM, Webex (Cisco), UCAS, and eVision to record enquiries, verify applicant information, and guide students through the clearing enrollment process
- Advised callers on course eligibility by assessing academic results against admission requirements in real time and resolved queries efficiently and offered alternative course options where appropriate
- Supported students in troubleshooting access and navigation issues within UCAS and eVision, ensuring a smooth positive user experience
- Balanced a high volume of recurring calls and competing priorities, strengthening time management and organizational skills
- Worked independently while contributing to a wider support team, escalating complex queries where necessary

PROJECTS

Start-up Restaurant POS System

Polokwane, South Africa

Individual Project

Aug 2023 – Oct 2023

- Developed a small start-up restaurant point of sale system that would allow waiters to log the details of the food and drinks ordered by customers
- Implemented a button function that would print and store the receipt in a text file
- Implemented a help menu that would allow users to understand the program and how it operates

SwiftBot

London, UK

Team Leader

Oct 2024 – Dec 2024

- Implemented an electronic game called Simon on a SwiftBot, a Raspberry Pi Linux based robot
- Integrated and debugged code contributions from team members to produce a fully functional Simon game on the SwiftBot
- Created a program to create a randomized colour sequence for the game program

SwiftBot

London, UK

Individual Project

Dec 2024 – Feb 2025

- Developed a MasterMind game that would generate a sequence of random colours and would allow users to scan different colour cards using the SwiftBot camera to match the random colour sequence created by the program

Full Stack Developer (SDG 12 Web Application)

London, UK

Group Project

Oct 2025 – April 2026

- Developed a recommendations page that allows users to view repair facilities and services based on their device type, promoting responsible consumption and reduced electronic waste
- Integrated DIY repair guides to support sustainable device usage
- Used GitHub for version control and team collaboration in a full-stack web development environment
- Built front-end components using HTML, CSS and JavaScript, focusing on usability and accessibility

ACTIVITIES AND LEADERSHIP

Brunel Society of Blockchain

Member

London, UK

Nov 2024 – Current

SKILLS

Programming: Java, SQL, HTML, CSS, JavaScript

Tools: IntelliJ, Eclipse, Git, Spring Boot, Agile, Netbeans, DB Browser, MS Access, GitHub, Visual Studio Code, Azorus CRM, Webex (Cisco)
